CAP-206-Mainland Drain Wetlands, Waterford Township, MI

Habitat Focus Area

Project Location: The Mainland Drain project is located on the headwaters of the Clinton River near the city of Pontiac, Michigan. The project is located within the Oakland County Center complex on Telegraph Road.

Project Description: The Mainland Drain project would restore native vegetation and wetlands in the Oakland County Center area at the headwaters of the Clinton River. The project is located within the Clinton River Area of Concern. The project contains removal of the invasive plants that have invaded the area and would restore the Mainland Drain to a freeflowing stream. The project would also reduce erosion near the Children's Village area that is impacting the river and the Waterford Oaks Trail. This project is authorized under Section 206, Water Resources Development Act of 1996, as amended – Aquatic Ecosystem Restoration.

Non-federal Partner: MDEQ / Oakland County Drain Commissioner

Project Benefits: The project would restore critical habitat at the headwaters of the Clinton River. The project would remove invasives Phragmites from the headwater area and restore connectivity for several small wetlands.

Project Status: FY15 funds were used to coordinate with the Sponsor and finalize the Determination of Federal Interest with the Sponsor. FY17 funding would be used to complete feasibility studies and develop a Feasibility Cost Share Agreement with a non-Federal Sponsor.

Estimated Project Costs	
Federal	978,800
Non-Federal	521,200
Total	1,500,000

Project Milestones	
Submit Feasibility to LRD	Aug 2016
Award Construction Contract	Feb 2017
