

PROJECT FACT SHEET
(24 February 2004)

PROJECT: Cass River Spaulding Township, Michigan

DESCRIPTION: The project is located at the Cass River in Saginaw County between East (M-13) Street and Sheridan Road. The existing levees on the north and south sides of the Cass River (except for the portion completed in early 1999 by the Township) will be relocated away from the banks of the Cass River to create a floodway shelf for added capacity and for wetland mitigation. The Cass River has flooded nearby homes and businesses in Spaulding Township on an almost semi-annual basis for the past 30 years. During some of these floods traffic on major highways has been stopped, and at times has made emergency rescue services (fire and ambulance) impossible. The existing levees on the north and south sides of the Cass River (except for the portion completed in early 1999 by the Township) are in poor condition and portions appear to be unstable. In addition, the low top elevations of the existing levees do not adequately protect the area from flooding.

CONGRESSIONAL INTEREST: Camp (R) MI-5; MI Senators Levin (D) and Stabenow (D)

LOCATION MAP & PICTURE: N/A

NON-FEDERAL PROJECT SPONSOR: Spaulding Township, (POC: John Tagget, 989-777-2007)

PROJECT AUTHORITY: Section 205 of the Flood Control Act of 1948, as amended.

FUNDING:

	<u>Total</u>	<u>Federal</u>	<u>Non-Federal</u>
Current Working Estimate	TBD	TBD	TBD
Funds Expended prior to FY04	\$ 51,194	\$ 51,194	\$ 0
Funds allocated in FY04	\$ 20,000	\$ 20,000	
FY05 Budget	\$ 0	\$ 0	
Funds that could be used in FY05	\$ 75,000	\$ 75,000	
Funds required to complete (> FY05)	TBD	TBD	TBD

STAGE: Feasibility

STATUS: Upon new WRDA 05 language, feasibility phase scheduled for completion FY05 culminating in a Detailed Project Report.
