
RECONNAISSANCE REPORT

September 2000

ST. JOSEPH RIVER AND SPY RUN CREEK, INDIANA

**ECOSYSTEM RESTORATION AND FLOOD DAMAGE
REDUCTION**

**US Army Corps
of Engineers®**

Detroit District

**Reconnaissance Report,
Section 905(b) (WRDA 86) Analysis**

**St. Joseph River and Spy Run
Creek, Indiana**

**Ecosystem Restoration and Flood
Damage Reduction Study**

27 September 2000

**US Army Corps
of Engineers®**
Detroit District

**Reconnaissance Report
St. Joseph River and Spy Run Creek, Indiana
Ecosystem Restoration and Flood Damage Reduction Study**

TABLE OF CONTENTS

1. Study Authority	1
2. Study Purpose.....	1
3. Location of Study, Non-Federal Sponsor and Congressional Districts.....	2
4. Prior Report and Existing Projects.....	3
5. Plan Formulation.....	6
a. National Objectives.....	7
b. Public Concerns.....	8
c. Problems & Opportunities.....	9
d. Planning Objectives.....	12
e. Planning Constraints.....	13
f. Measures to Address Identified Planning Objectives.....	13
(1) Spy Run Creek Flood Control	
Alternative 1.....	14
Alternative 2.....	14
Alternative 3.....	15
Alternative 4.....	17
Alternative 5.....	19
Alternative 6.....	20
(2) Spy Run Creek Aquatic Habitat Restoration	
Alternative 1.....	21
Alternative 2.....	21
Alternative 3.....	22
(3) St. Joseph River–Cedarville Reservoir Aquatic Habitat Restoration	
Alternative 1.....	23
Alternative 2.....	23
g. Preliminary Plans.....	23
(1) Preliminary Plans Eliminated from further Consideration.....	23
(2) Preliminary Plans for Further Consideration.....	25
h. Conclusions from Preliminary Screening	29
6. Federal Interest	30
7. Preliminary Financial Analysis.....	39
8. Assumptions and Exceptions.....	41
9. Schedules.....	42
10. Views of Other Resource Agencies.....	42
11. Potential Issues Affecting Initiation of the Feasibility and P&D Phases....	43
12. Project Area Map.....	43
13. Recommendations.....	43

**Reconnaissance Report
St. Joseph River and Spy Run Creek, Indiana
Ecosystem Restoration and Flood Damage Reduction Study**

TABLE OF CONTENTS (Continued)

- Attachment 1 - Correspondence, City of Fort Wayne, Recommend Sec 205
- Attachment 2 - Correspondence, City of Fort Wayne, Recommend Sec 206
- Attachment 3 - Location map for both study sites, Spy Run Creek and the St. Joseph River – Cedarville Reservoir .
- Attachment 4 - Location map of the proposed Section 205 site along Spy Run Creek (Eastbrook and Westbrook neighborhoods) .
- Attachment 5 - Map of the existing flood control levee location along the east bank of Spy Run Creek .
- Attachment 6 - Map of the proposed Section 206 site at Spy Run Creek (Franke Park) .
- Attachment 7 - A map of the St. Joseph River - Cedarville Reservoir at the town of Leo- Cedarville is provided as Attachment 7.
- Attachment 8 - A typical cross-section of a clay and plastic sheet piling floodwall proposed in Alternative 4 .

Tables

1. Road Overtopping Analysis	13
2. Spy Run Creek Flood Control Alternative 3 Cost Estimate Construct an Adjustable Head Dam near the mouth of Spy Run Creek .	16
3. Spy Run Creek Flood Control Alternative 4 Cost Estimate Construct a Flood Control Levee along Spy Run Creek in the neighborhood of Eastbrook and Westbrook Avenues	18
4. Spy Run Creek Flood Control Alternative 5 Cost Estimate	20
5. Spy Run Creek Flood Control Alternative 6 Cost Estimate Home Flood Proofing	20
6. Spy Run Creek Aquatic Habitat Restoration Alternative 2 Cost Estimate Wetland Creation (15 acres).....	22
7. Average Residential Market Value Feasibility Report Spy Run Creek.....	31
8. Number of Structures Inundated by Flood Feasibility Report Spy Run Creek	32
9. Number of Structures Inundated by Reach Lower Spy Run Creek	32
10. Number of Structures Flooded, by Flood	33
11. Average Annual Property Damage Spy Run Creek (\$ 000).....	33
12. Average Annual Property Damage Reduction Spy Run Creek (\$ 000) ...	34
13. Average Annual Content Damages Spy Run Creek (\$000).....	34
14. Average Annual Content Damages Prevented Spy Run Creek (\$ 000).....	35
15. Benefit Summary (1,000's).....	36
16. Spy Run Creek Economic Summary.....	37
