PROJECT: Otsego Lake Otsego County, Michigan

DESCRIPTION: Otsego Lake is located in Otsego County, Michigan. The lake has experienced deteriorating water quality and sedimentation problems. The study scope of work will explore the possible actions to control the sedimentation and flocculent problems in Otsego Lake and make recommendations on possible methods of lake ecological restoration. Dredging the lake is necessary for removing sedimentation and creating areas with depths that will limit weed growth and provide a more balanced ecosystem which will slow eutrophication.
