PROJECT INFORMATION SHEET February 2011

PROJECT: St. Clair River and Lake St. Clair, Michigan - (C)

DESCRIPTION: The St. Clair River and Lake St. Clair form the border between Michigan and Canada and flow southward connecting Lake Huron to the Detroit River and Lake Erie. The St. Clair River-Lake St. Clair binational system provides drinking water to more than 4.5 million people, recreation for millions more, and is vital to thousands of industrial facilities, businesses and homeowners. The Corps prepared a Management Plan for the Lake and the River. Implementation of individual projects will require development of multiple feasibility reports. WRDA 2007 authorized the Corps to implement the recommendations of the Management Plan.
