**ADDITIONAL INFORMATION SUPPORTING NJD** (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite):

The USDA NRCS mapped the wetland correctly as a borrow pit surrounded by natural soils. The geomorphology of the wetland is that it was dug out of an upland morainal ridge that surrounds a kettle lake. The ridge is not hydrologically part of the kettle lake.
