U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG

## I-Saginaw River Deepening Feasibility, Saginaw, MI

### Description

The main stem of the Saginaw River is formed by the confluence of the Tittabawassee and Shiawassee Rivers. It flows north for 22 miles and empties into the head of Saginaw Bay, which is part of Lake Huron. The cities of Saginaw and Bay City are located on the river. The purpose of the study is to evaluate the deepening of the shipping channel as it pertains to the economic benefit of the Saginaw region and the nation. The study will investigate deepening the inner channel from the river mouth to the 1st Street Turning Basin at river mile 17.5. The existing inner channel declines in depth from 25 feet at the river mouth to a 22-foot minimum depth in the 14.5 mile upstream reach. This study will investigate deepening the entire channel to the 1st Street Turning Basin to depths of 24, 25, or 26 feet.

### Congressional Interest

Kildee (MI-5); Senator Peters (MI), Senator Stabenow (MI)

### Location Map & Picture

### Non-Federal Project Sponsor

Saginaw County, Michigan

### Project Authority

Section 456 of the Water Resource Development Act of 1999 (WRDA) - The Great Lakes Navigation System Review

<b>Funding</b>	<u>Total</u>	<u>Federal</u>	<u>Non-Federal</u>
Current Working Estimate:	\$ 1,300,000	\$ 650,000	\$ 650,000
